Spring 2020 Course Feedback Form

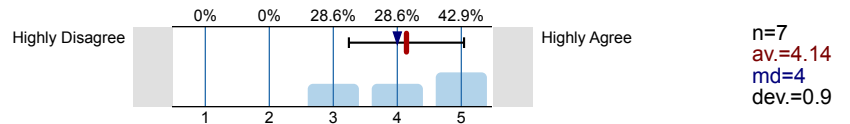

Expectations for this course were communicated to me by my instructor.

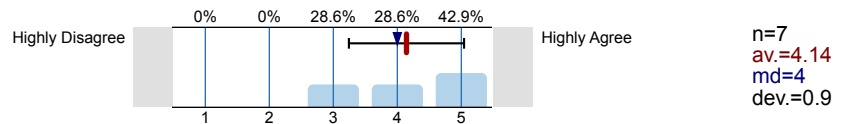

Changes that occurred during the transition to a remote environment were communicated (If this course was originally offered online, please mark NA).

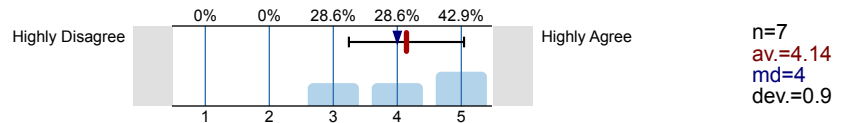

I had access to the resources I needed (e.g., readings, lectures, video, physical materials, etc.) to meet the course objectives.

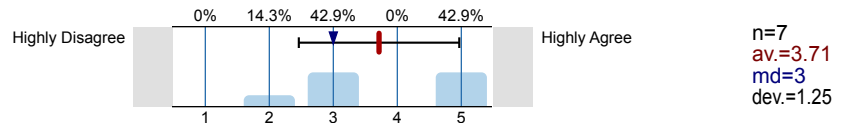

I had opportunities to demonstrate my understanding of the course content through assigned activities.

I was encouraged by my instructor to do my best work.

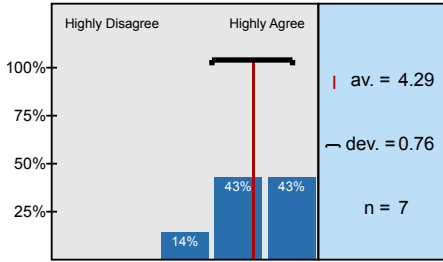

Overall, the course was organized/offered in a way that I could, to the best of my ability, achieve the student learning outcomes of the course.

Spring 2020 Course Feedback Form

Comments Report

Spring 2020 Course Feedback Form

What are some of the major strengths of the course?

- All of the instructions were communicated clearly and since the transition to online the teachers have been very patient and helpful with making the course the best it can be.
- NA
- Turning in assignments and taking notes from chapters

What are some of the major opportunities for improvement?

- I think moving this course to where it is completely in person would help with students understanding. Not everyone can learn from reading a book and very little in class instruction. I also think it would be key to have an instructor that is better at explaining things to students.
- None, everything is very clear and helpful.
- Thoroughly going through the chapter more frequently.

Please use this space to share any additional comments you have about the course.

- After the transition to online course I believe that it would have been best if recorded lectures were available to students seeing that this is one of the most complex classes. Taking this course online along with exams has been a struggle and I believe that more help could have been offered to students for this class during this pandemic.
- I asked the professor very nicely after the first week of online work if there was anyway she could give us some sort of videos to watch for the course (either from her, the Grad Student, or the internet) and she said no it was not possible and she had no interest in doing that. I was seeking help and felt like she did not care at all. Don't see the point in having an actual professor for this class if they do not interact with the students at all. Felt like I wasted money just to teach this class to myself all on my own.
- None
